

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, Ruby
GenAI & AI Tooling: Google Gemini API, Prompt Engineering, LLM Applications, AI Workflows, Context Handling
Frontend: React.js, HTML5, CSS3, Streamlit
Backend: Node.js, Express.js, Ruby on Rails, Django, FastAPI, Rust
Databases: MongoDB, SQL, Google Cloud
Tools & Platforms: Git, GitHub, Sidekiq, Airbrake, Linux, Postman, Docker
Concepts: Data Analysis, REST APIs, Authentication, Database Indexing, Containerization, OOP

PERSONAL STATEMENT

Builder-focused software engineer with internship experience at Zolvit and strong interest in GenAI systems, LLM-powered applications, and scalable backend engineering. Passionate about building AI-driven products using Python, APIs, and modern developer tooling. Experienced in developing production-ready systems, optimizing backend performance, and contributing to open-source projects. Curious about AI agents, system reliability, security, and real-world problem solving in startup environments.

EXPERIENCE

Zolvit (VakilSearch) Backend Developer Intern	May 2025 – Sept 2025
• Technology used: Ruby on Rails, SQL, Sidekiq, JavaScript, Airbrake. • Impact delivered: Improved backend performance by 25%, reduced DB latency by 30%, and automated 5K+ daily jobs. • Recognitions or Highlights: Delivered production-ready features, resolved critical Airbrake issues, and improved system reliability. • Key Learnings: Built expertise in backend optimization, debugging, and scalable system design in a production environment.	

PROJECTS

MentorAI Github Repo Link	2026
• Built an AI-powered study assistant using Google Gemini LLM and Streamlit to help students explain concepts, summarize notes, and generate quizzes. • Implemented prompt-based workflows for explanation, summarization, and quiz generation using Gemini APIs. • Designed conversational session context handling for follow-up interactions and improved user experience. • Developed a responsive Streamlit interface for seamless interaction with AI-generated outputs. • Explored practical applications of LLMs, prompt engineering, and context-aware AI systems.	

Tech Stack: Python, Google Gemini API, Streamlit, Prompt Engineering

- Built a full-stack health insurance claims platform with secure authentication and real-time claim tracking.
- Developed REST APIs and role-based dashboards for users and administrators.
- Implemented JWT authentication and Google OAuth for secure access management.
- Optimized MongoDB queries to improve application performance and scalability.
- Gained experience in backend architecture, access control, and scalable full-stack application development.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Google OAuth

PulsePoint | [Github Repo Link](#)

2026

- Analyzed employee engagement survey data to identify dissatisfaction trends and department-level insights.
- Applied data cleaning, visualization, and exploratory analysis techniques using Python and Jupyter Notebook.
- Built dashboards and reports to support data-driven HR decision making.

Tech Stack: Python, Jupyter Notebook, Power BI, Excel, React.js

OPEN SOURCE CONTRIBUTION

- **Contributed to Developers Event Platform by implementing event discount code display from METADATA.csv.**
- **Added Code of Conduct access functionality to the OSEM Project.**
- **Built a slash-command app for Rocket.Chat to capture mentions and trigger alerts.**
- **Active open-source contributor and aspiring Google Summer of Code (GSoC) participant.**

EDUCATION ENROLLMENT

Kalvium's UG program in CS (Software Product Engineering)

2025-27

The Apollo University | Murukambattu, Chittoor

ACHIEVEMENTS & EXTRACURRICULARS

- **Hackathons & Competitions:** Secured 3rd Prize in a college hackathon (50+ teams) for identifying vulnerabilities and resolving critical system issues.
- **Technical Contributions:** Solved 400+ LeetCode problems, strengthening DSA and problem solving skills; active open-source contributor and GSoC aspirant.
- **Campus Engagement / Leadership:** Presented a technical paper and maintained structured documentation of weekly activities in the Event Management Club, improving coordination and knowledge sharing.
- **Personal Interests:** Exploring cloud technologies (AWS EC2, S3, IAM) and upskilling through hands-on workshops.
